## Brava Food Industries are now in control of their products through SAP Business One

Brava Food Industries is a private limited Kenyan company. We manufacture both carbonated and non-carbonated non alcoholic soft drinks.

### Before: Challenges and Opportunities

- We needed a system that could track the product from planning phase right through manufacturing and to the distribution partner
- We were looking for a product that could assist us in our quality control and to keep standards high

### Why SAP and Partner

- We received a recommendation from our sister company to use both SAP Business One and Seidor Africa
- Seidor Africa gives us instant support and guides us should we have any difficulty
- SAP Business One is a robust system

### After: Value-Driven Results

- All our systems are now integrated into one. From manufacturing, distribution, financial and sales
- SAP Business One has improved our quality and consistency in our products through giving accurate and instant information where needed

*"We can easily see the profit margin rising."*

Harrison Kamau, IT Head, Brava Food Industries.
