Coopers ES can get things done faster with SAP Business One

Established in 1999 Coopers ES is very proud to support companies and individuals with premium quality and highly effective products. Coopers ES is well established in South Africa and has offices in the main centres of the country.

We also have arrangements with Multi-National Companies and market their Brands to extend the Range of products we can offer.

We have a Range of Products for the Professional Pest Control industry, the Grain Storage industry as well as the Reseller of Pesticides for the Home Owner.

Before: Challenges and Opportunities

- Our previous system was difficult to use and very unstable
- Any adjustments to the system was at a great cost, and very time consuming

Why SAP and Partner

- Instability in previous system, no need for customization outside of the system, SAP Business One met their full set of requirements

After: Value-Driven Results

- Time efficiency, workload reduction, adherence to business rules and practices, approvals & alerts, forecasting with MRP
- Seidor Africa assisted us with a smooth transition into the new system

“What used to take several days can now be done in a matter of minutes.”

Tienie Jordaan, Financial Director, Coopers Environmental Science.
