SAP Business One has transformed how Dakawou Transport does business

Dakawou Transport Limited is a transportation company. It started operations over twenty five years ago, delivering oil and gas products locally with a fleet size of 150 trucks.

Before: Challenges and Opportunities

- We were in need of a system that could give us truck analysis and maintenance reports as part of the normal daily reporting
- Our systems were disjointed and this made it difficult to analyze our profit margins with accuracy

Why SAP and Partner

- SAP Business One was chosen for its versatility
- Seidor Africa has great attention to detail and make sure each process is mapped out sufficiently before implementation starts

After: Value-Driven Results

- SAP Business One has made our team work more efficiently
- Our processes are running smoothly and decisions can be made faster
- Information is easy to extract and customer queries can now be answered with accuracy and in a timely manner

“With SAP Business One and Seidor Africa we have been able to exceed expectations.”

Mohammed Abdulle. Managing Director. Dakawou Transport.
