SAP Business One Allows Explast the ability to grow

Explast Ltd is one of the leading packaging and producing companies of high quality printed plastic packaging and polybag in Mauritius. Established in 1984, for over 24 years, the company's continuous change and expansion has had a strong impact on the plastic manufacturing industry in Mauritius and Explast has now started to lead the way in its industry.

Before: Challenges and Opportunities

- Our information accuracy was built on assumption and we needed a system that could verify to true numbers and data correctly and quickly
- We needed more control over our inventory

Why SAP and Partner

- Seidor Africa has both online and on site support with quick turnaround times
- Seidor Africa assisted us in pre-configuring our SAP system to fit our business better
- SAP is represented both locally and internationally
- The inventory management and production capabilities SAP Business One offers is best in class

After: Value-Driven Results

- Increased Speed to the market,
- We are now able to deliver better customer service due to our ability to report and track anything quickly and effectively
- We now have the potential for growth and expansion

Since SAP Business One it is an automated system we can trace almost everything."
