With SAP Business One ISOBoard is able to track transactions instantly across regions

IsoBoard is South Africa's premier thermal insulation board. It has more application alternatives than any other insulation board. The board can be installed in roof liner, ceiling, cavity-wall or under floor applications. It can often be repaired in place when damaged, and painted if required. IsoBoard is effectively waterproof and therefore allows its use in inverted roof applications, as well as in very high humidity applications within agriculture, aquaculture and manufacturing plants.

Before: Challenges and Opportunities

- We needed to be able to monitor all our assets and transactions on a real-time basis
- We needed an automated system that could show us what each branch is doing instantly and let the books reflect any changes immediately

Why SAP and Partner

- Seidor Africa has been our support throughout the implementation and for more than a decade since
- Seidor Africa assists us in understanding the SAP Business One software more and more
- SAP Business One was chosen for the capability of integrating all the different systems into one
- SAP Business One's reporting system is world class

After: Value-Driven Results

- Connected the whole country as one network
- Saves us time and ensure effective deployment of resources

"SAP Business One allows us to do what we do."

Mark Russell, Marketing Manager, ISOBoard.
