Products and Services
Import & Export

With SAP Business One LEAO can report on any part of the business, instantly

Leão International Trading was established in 2003 as an import and export business based in Cape Town, South Africa. Leão International Trading has been procuring and supplying a vast range of products to clients in countries including Angola, Cameroon, Equatorial Guinea, Madagascar, Nigeria, Mozambique and Liberia. Leão International Trading has its own storage and loading warehouse allowing for container consolidation and storage of products. The company focus is on the hospitality industry supplying catering products and equipment for companies at remote locations.

Before: Challenges and Opportunities

- Our previous system was not integrated, meeting a price update on one document did not update on all our documents. This opened the window of opportunity for endless human errors and missed updates relating to prices for our customers. The reporting structure was non-existent

Why SAP and Partner

- From the professional sales team, through to the demonstration given to us and the testimonials of the existing clients with a similar business model, Seidor Africa took time to understand our business and the structures in place that are specialized to what we do

After: Value-Driven Results

- SAP Business One offers us an easy reporting structure ensuring our business flow is done correctly. It also offers easy data entry and is a far more time efficient system.

A very user-friendly experience for my staff and management team."

Timothy Coogan, Director , Leao International.
