SAP Business One brings everything together for MTU South Africa

We provide pioneering, integrated solutions for the marine & infrastructure sectors and focus on digitalization and electrification. Under the MTU brand, we develop and produce high-speed engines and propulsion systems for ships and heavy land, rail and defence vehicles, as well as drive systems for use in the oil and gas industry and in power generation. The aim is to make diesel engines even cleaner and smarter.

Before: Challenges and Opportunities

- Complimentary to the recommendation from Germany we replaced a bad legacy ERP system to improve on various aspects of our business. There was also a lack of support from our old ERP system

Why SAP and Partner

- Delivered on time, on budget and was the best SAP Business One implementation within the Tognum Group

After: Value-Driven Results

- Tighter controls in critical business processes, better reporting, increased transparency in terms of system changes and insight to where the business is going benefited us greatly

Not one day was lost due to downtime."

Peter Laubscher, IT Systems and Telecommunication Manager, MTU South Africa.
