Plastic-ware Wholesalers

## SAP Business One saves time for Mambo's Plastic Warehouse

We store, organise and prepare our lives using plastic products every day. This is because they provide great value by being reusable, versatile, recyclable and affordable to name just a few indispensable features. For this reason, plastic ware has served its purpose well and isn't going to be losing appeal anytime soon.

### Before: Challenges and Opportunities

- Various subsystems, manual capturing, the need for integration, automation and increased control

### Why SAP and Partner

- Seidor Africa and SAP Business One provided the seamless integrated system we needed to move our business forward. It covers the selling/point of sale (POS) process, the buying/ordering process, accounting functionality and real time business insight we needed

### After: Value-Driven Results

- Clean master data, alerts & approvals, access to real-time data, automation & control, company-wide standardised approach to inventory planning, fully integrated POS

*"We experienced a 90% reduction in purchase order processing time."*
