With SAP Business One Mineral-Loy is saving time

Mineral-Loy commenced trading in 1975 to meet the needs of the users of metals, minerals and alloys in the South African market. At the time of establishment, focus was on the welding electrode industry, but it soon widened its scope of activities to iron and steel foundries, the aluminium industry and ceramic and refractory products. Mineral-Loy has recently also made acquisitions in the chemicals and automotive aftermarket space which significantly widens our product offering and exploits the synergies between the various trading/wholesale businesses.

Before: Challenges and Opportunities

- We were looking for an ERP solution that would make it easier and quicker to access data in real-time, with data integrity that could be relied on

Why SAP and Partner

- SAP Business One has many levels of authorisation, making it easy to control access, input and confidentiality
- It also enables us to generate timeous and accurate monthly Management Reports

After: Value-Driven Results

- With SAP Business One we experienced significant time saving by doing away with duplicate data processing, the ease with which accounts can be reconciled and the ease of printing accurate and meaningful reports

Seidor Africa was willing to take time out to understand our business structure and meet our needs in the best way possible."

Kim Edmond, Financial Manager, Mineral-Loy (Pty) Ltd.
