Petroleum Products

Net Gas & Energy run simple with SAP Business One

Net Gas & Energy Limited was incorporated in the year 2013. Though a relatively new entrant in the oil marketing field, Net Gas Energy Limited has managed to establish its presence and reputation as a progressive and dynamic organization, focused on providing quality petroleum products and services, in East and Central Africa.

Before: Challenges and Opportunities

- Previous system had minimal control on stocks
- The system was not user friendly and not well-organized
- There was no proper audit control
- Insecurity and vulnerability as you could delete invoices

Why SAP and Partner

- SAP Business One is common with other oil and gas companies
- Seidor Africa were referred to us by another company
- It is a full ERP that caters to all our needs
- The system has clear audit trails

After: Value-Driven Results

- Net Gas has seen that reporting has become much faster and more efficient
- Improved security of their data as there are good control features and structures
- Stock management has become more streamlined

“ *SAP Business One is an efficient business management system with good controls.* **”**
