## SAP Business One was the answer for Olympic Petroleum

Olympic Petroleum Limited is a fully fledged Kenyan and regional oil marketing company with significant commercial presence in East Africa and Great Lakes Regions. Our operations are spread across Kenya, Tanzania, Uganda, Rwanda, South Sudan and Democratic Republic of Congo.

### Before: Challenges and Opportunities

- We needed a system that can be used by all departments from Finance, Logistics and down to stores which would make our operations more efficient and stream-line the flow of information

### Why SAP and Partner

- One of the main reasons we chose SAP Business One was the integration and reporting capabilities. We wanted a system that could be used across all our country operations and provide a real-time view of the financial status per country and also in a consolidated view

### After: Value-Driven Results

- Through running SAP HANA on the cloud, we have greatly reduced on our infrastructure costs and have benefited from the use of the inbuilt business intelligence through the HANA reporting tool

*“Through the use of the customized reports, we are able to have up to date information on the company’s performance and make informed decisions.”*

Zeitun Garat, Head of Finance, Olympic Petroleum Ltd.
