PEX is able to more efficiently allocate resources due to SAP Business One

PEX launched in 2008 High growth markets present a unique set of payment challenges, and opportunities. At PEX we take a scientific approach to solving tomorrow's payment challenges. Today. Our technology powers end-to-end payments across the world's fastest growing markets. From issuing and acquiring to processing and digital payments, we are certified as per industry standards to help financial institutions get their businesses up and running with the latest products and solutions, ready for today, geared for tomorrow.

Before: Challenges and Opportunities

- PEX needed an accounting and business management software that grows with them as they strive to become the number one online payment software in Africa

Why SAP and Partner

- Seidor Africa was our partner of choice due to their reputation in the market for their sufficient implementation and their overall business knowledge
- SAP Business One is well-known for being a powerful and comprehensive business management software

After: Value-Driven Results

- SAP saves a lot of time over manual bookkeeping
- Extraction of financial statements is quick
- The process runs faster and more efficiently

SAP Business One provides a direction and hence, goal congruency prevails in the company."
