SAP Business One ensures RF Design gets more out of their time spend

RF Design was established in 1988 as a supplier of RF / Microwave components with an office in Cape Town, South Africa. We have since grown to represent a balanced portfolio of the world's premier Wireless Data Communications, RF /Microwave component and Sub-systems manufacturing companies with branches in all the major commercial centres of Gauteng, Cape Town and Durban with a staff compliment of about 30 employees presently.

Before: Challenges and Opportunities

- We needed to streamline our processes from sales to finance
- We were looking for an automated system that can adapt to changes in the marketplace

Why SAP and Partner

- Seidor Africa supports us through discussing the functionality and capabilities of the system on a regular basis
- Seidor Africa understands what is relevant to our business and keeps us informed
- SAP is an international company with many years of experience within ERP

After: Value-Driven Results

- SAP Business One integrates everything into a single package
- We could replace all the old systems which we were manually doing into one automated system

"SAP Business One makes life easier."

Bev Barnard, Financial Director, RF Design.
