Swavet injects efficiency into business processes with SAP Business One

Swavet specialises in supplying veterinary medicine and instruments to livestock farmers in South Africa. Since implementing SAP Business One in 2005, all of the company's activities flow through the integrated solution, including orders, invoices and inventory control, with real-time reporting to inform business decision-making. SAP Business One has become indispensable to the functioning of the business and gives Swavet a huge advantage over its competitors.

Before: Challenges and Opportunities

- Business had outgrown its standalone accounting solution
- Time-consuming, manual reporting and administration
- Manual process of sales commission calculation
- Manual maintenance of price lists resulted in pricing errors

Why SAP and Partner

- SAP Business One addressed the company's needs in a single, integrated, easy-to-use solution
- Seidor Africa understood Swavet's unique requirements
- Seidor Africa is highly responsive and solves any challenges quickly

After: Value-Driven Results

- Much better productivity and efficiency in the processes.
- Greater visibility of company financials through reporting and analytics
- Profitability and KPI indicators per business line shows where the company should focus
- Tracking stocks through the system reduces losses and thefts

“ We changed to SAP Business One and I think it is one of the best investments we have done. SAP Business One gives us a huge advantage over our competitors and opens up doors for the future.”

Fritz Rexrodt, Managing Director, Swavet.
