## SAP Business One gives Soill the ability to grow and adapt as needed

In 1993 Southern Oil (Pty) LTD revolutionised agriculture in the Western Cape by establishing canola as a crop in South Africa. SOILL has built a well-respected, premium brand with an ever-expanding basket of products under its retail brand name, B-well. In the B-well brand, we believe that everyone should be able to eat delicious food that's healthier, more affordable and better for the environment.

### Before: Challenges and Opportunities

- We needed a system that could help us manage the full supply chain from start to finish
- Reporting was a crucial necessity for us across all divisions

### Why SAP and Partner

- Seidor Africa has consultants that assist us with implementing our ideas into the system
- One of the most valuable things we get from Seidor Africa is advice
- SAP Business One allows us to integrate with other systems

### After: Value-Driven Results

- The ability to grow and adapt rapidly
- Saves us time and ensure effective deployment of resources

**“** SAP Business One assist us in getting all the different working parts to work together for one goal”.

George Turk, Snr Business Analyst, Soill.
